CHRISTIAN DJEUKEU

Leeds LS8 - 07474926221 - christian@djeukeu.com

Website: djeukeu.com | **LinkedIn:** linkedin.com/in/djeukeu

PROFESSIONAL SUMMARY

A hardworking, communicative and results-oriented software developer with extensive experience in full-stack development, cloud computing and DevOps. Skilled in designing, developing and deploying scalable web and mobile applications using modern frameworks such as React, React-Native, Node.js and Spring Boot. Skilled in AWS, Terraform, Docker and CI/CD pipelines to ensure efficient and automated deployment processes.

SKILLS

- Mobile Development
- Front-end Development
- Back-end Development
- Software Architecture
- Cloud Computing
- Software Automation
- UI / UX Design
- Software Testing

EDUCATION

2024 - 2025	**Web & Software Development Programme** ITonlinelearning
2019 - 2020	**Bachelor of Technology (BTech) in Computer Engineering** Institut Universitaire De La Côte (IUC)
2017 - 2019	**Higher National Diploma in Computer Engineering** Institut Universitaire De La Côte (IUC)

CERTIFICATIONS AND LICENSES

2025	**Microsoft Certified: Azure Fundamentals** | Microsoft
2024	**AWS Certified Developer - Associate** | Amazon Web Services
2024	**HashiCorp Certified: Terraform Associate (003)** | HashiCorp
2023	**AWS Certified Cloud Practitioner** | Amazon Web Services

WORK HISTORY

Dec 2023 - Present — **Software Developer** | Freelance

- Collaborate closely with clients to gather requirements, define project scopes, and deliver high-quality software solutions within deadlines.
- Design and prototype user interfaces using Figma and Adobe XD, ensuring visually appealing and user-friendly applications.
- Develop robust, scalable, and maintainable applications by translating UI/UX designs into fully functional software solutions using React and React-Native.
- Optimise cloud infrastructure and automate deployment processes using AWS, Terraform, and Docker, improving system reliability and efficiency.
- Implement CI/CD pipelines with GitHub Actions to streamline software development workflows, ensuring seamless deployment and integration.
- Perform E2E testing with robust assertions using Playwright
- Define user behavior with Locust tasks (HTTP requests, form submissions)

Aug 2022 - Nov 2023   **Software Developer** | Orbite Holding

- Led and contributed to the full software development lifecycle, including requirement analysis, design, development, testing, deployment, and maintenance.
- Designed and implemented CI/CD pipelines to automate build and deployment processes, enhancing efficiency and reducing production downtime.
- Conducted code reviews and collaborated with cross-functional teams to ensure adherence to best coding practices and maintain high software quality.
- Integrated Apache Kafka for real-time data processing, improving system performance and scalability.
- Maintained comprehensive project documentation and reported progress to stakeholders, ensuring alignment with business goals and objectives

Dec 2021 - Sep 2023   **Software Developer & Course Instructor** | GetSmarter

- Designed, developed, and optimised full-stack applications, working closely with backend developers and UX designers to enhance functionality and usability.
- Conducted performance optimisation and debugging for web applications, ensuring smooth user experiences and high efficiency.
- Provided hands-on training as a part-time web development instructor, mentoring students in React, React-Native, Java, and Python, and guiding them through real-world projects.
- Implemented secure and scalable payment processing solutions using Stripe, ensuring compliance with financial industry standards.
- Collaborated with teams to continuously improve development processes, adopting modern frameworks and technologies to enhance product quality.

Sep 2021 - Nov 2022   **Junior Software Developer** | Arrah Solutions

- Maintained and enhanced existing applications, implementing new features and resolving bugs using modern development tools and frameworks.
- Developed and optimised database queries with TimescaleDB, improving data retrieval efficiency and system performance.
- Contributed to CI/CD pipeline integration, pull requests, and code reviews to ensure high code quality and development best practices.
- Assisted in designing microservices architecture using Apollo Federation, enabling seamless communication between services.
- Worked closely with senior developers and product managers to refine application features, enhancing functionality and user experience.

Jun 2021 - Aug 2021   **Software Developer Intern** | Arrah Solutions

- Gained hands-on experience in React and React-Native development, learning best practices for building scalable and maintainable applications.
- Assisted in debugging and optimising applications, ensuring improved performance and responsiveness.
- Worked collaboratively with developers, designers, and product managers in a remote environment to successfully deliver project milestones.
- Gained familiarity with Docker and AWS, contributing to deployment and cloud-based solutions.
- Utilised Lighthouse to enhance web application performance, accessibility, and SEO

LANGUAGES

- English (Fluent): Speak, Read, Write
- French (Fluent): Speak, Read, Write
